## SKILLS

Swift

Objective-C

Python

Java

UIKit

Storyboard

SwiftUI

WidgetKit (SwiftUI)

REST APIs

GraphQL APIs

CoreData

CloudKit

Git & Github

Grand Central Dispatch

Unit Testing

UI Testing

Cocoapods

Carthage

Firebase

MapKit

Auto Layout

App Store Connect

Adobe Photoshop

Adobe InDesign

## Summary

Passionate iOS software developer with a background in customer service. Experience with Swift, Objective-C, Python, Java, object-oriented programming, and a strong understanding of data structures and algorithms.

## Projects

### NeoMusic

SwiftUI | MPMediaItem | Model View Controller Design Pattern

*Beautiful music player with a slick look based in Neumorphism built with SwiftUI.*

- Devised and executed app's development plan.
- Created beautiful design and simple user flow.
- Used Unit Tests to automatically test many features throughout the application.
- Implemented custom slider, tab bar, etc. to gain a stronger understanding of SwiftUI and add extra functionality that otherwise could not be implemented.

### Community Calendar

Swift | Auth0 | GraphQL | MVC + Notification Design Pattern

*Remain in the loop as events are hosted in your neighborhood with Community Calendar.*

- Developed on a remote, cross-functional team of 12 over eight weeks.
- Prioritized user-valued features to use time in the most effective way.
- Functioned as one of two iOS developers on a team composed of two Front End, three Back End, and three Android developers, as well as two UX Designers.
- Implemented GraphQL, UI, maps, calendar, and a custom search/filter feature.

## Experience

### dōTERRA

*Customer Service Representative, Orem, UT | June 2018 – October 2018*

- Consulted with customers on account problems, general questions, and product orders.
- Refined communication skills with customers as well as fellow employees.
- Handled sensitive information (credit card info, SSN) with care and responsibility.

## Education

### Lambda School

*Online | August 2019 – June 2020*

- Completed a 40-week iOS development training program.
- Worked with python, algorithms, data structures, graphs, C, and other operating systems.
- Created many iOS projects in Swift and Objective-C.
- Developed a strong problem-solving mindset.

### Shanghai American School

*浦东 Shanghai, China | August 2017 – June 2018*

- Completed AP Computer Science course in Java.
- Learned sorting, searching, and other algorithms.
- Learned about data structures and memory management.

## Achievements

- Eagle Scout – Earned Eagle in 2017 and strengthened leadership and hardworking skills.
- Service-Oriented - Participated in youth council, taking part in local service activities.
